

# SERVANT KEEPER for your Church Members

## Easy Viewing

Members can view their own and other members' shared information easily from any device.

## Secure

Secure, password-protected profiles allow members to update their personal and family information, and preferences.

## Tools for Getting Involved

Track areas where members want to serve. Plus, members can view personal pledge and giving info, register for events online, sign up for emails and more.

## Get Your Members Involved and Plugged In

### Online Member Profiles

A place for members to view and edit their own information.

### Secure Access From Anywhere

Online member profiles are secure, and password protected. Members can access them from anywhere on any device with just a browser and an internet connection.

- You decide what people can and can't update.
- Mobile friendly.
- Let people log in from your church website.

### Self-Manage Contact Information and Directory Display

Members will have the ability to add, edit, and update their own contact information online in the event of a move, as their families grow, or other information changes. They can also update their own photos. As a result, your database and directory will stay more current, and members can stay connected more easily.

### Check Pledging Status and Online Giving

Online member profiles give your members the ability to view:

- Personal and family giving history — both a general overview and detailed reports.
- Pledge details including the amount pledged, how much has been given, dates and more.

Plus, members can choose to display this information as a list or in easy-to-read graphs.

## Online Directory

Make it easy for members to connect.

## Online Giving

Members can give in the way easiest for them.

The online directory is included with Servant Keeper cloud for free. Members can access the directory either as a stand-alone site you give them a link to, or as a feature built directly into your church's website.

### Member Information is Secure

Members use a password you create to access the directory so it stays private and secure.

### Simple Search Feature

The built-in customizable search tool will allow your members to easily find the people they are looking for. This means even if member can't remember a person's name, they can filter results to find people in their Sunday School class, who live in their own neighborhood, or who are in a small group, as a few examples.

### Members Can Easily Contact Other Members

Members have a great need of being able to reach each other: by phone to discuss a ministry they serve in together, or to send a card offering condolences, or to drop off a casserole to new parents. With the online directory, members can always find the most up-to-date info right on their computer, or mobile device they carry with them.

### Encourage Access with Member Invites

Quickly send member invites by email encouraging members to access the directory. This is great when you're first setting it up or after adding new members.

### Can Be Saved as an App

For even simpler access, members are able to save it to their mobile devices as an app, and then pull up the directory with one touch.

### Increase Giving Options

Members and other contributors to your church can give in the way that is easiest for them:

- Online giving for members who want to contribute through your website.
- Text-to-give to encourage giving to special funds outside of services.
- Kiosks for services, events, and payments for services like daycare, or renting space.

Because Servant Keeper integrates with Vanco and most other major e-Giving providers, you can easily import all your electronic contributions into your regular contribution tracking.

## Events and Communications

Members can find and join events and communications more easily.

### E-Mail Lists

Create emails and manage email lists in Servant Keeper. Then, allow your members to choose to which lists they would like to be added (i.e. prayer chains, home groups, etc.)

### SK Events

Create and manage events in Servant Keeper. Then track attendance and do easy follow-up.

Even allow your members to register online with Eventbrite, and automatically sync registrations back to Servant Keeper.
